

Conspiratorium Rule Set

Table of Contents

1. Setup	3
2. Play	3
3. End Condition	3

Setup

Layout the board.

Split a token set of 100 tokens for each player affiliation equally amongst each player.

For example: For 2 players, each player gets 50 tokens of each player's affiliation.

Each player places x number of tokens on the board face down:

Short game: 10 tokens.

Medium game: 24 tokens.

Long game: 48 tokens.

Play

Each turn, a player may do one of the following actions:

Recon: Look at a token affiliation. Look at the face of a token without showing the other players

Turn: Change the affiliation of a token. Swap any token on the board (without looking at the face) with a token from the player set.

Move Asset: Move a token to an adjacent space on the board.

Assassinate: Have a token on the board target an adjacent token on the board; remove the targeted token from the board.

End Conditions

One token is left on the board.

The player matching the affiliation of the last remaining token on the board wins.
